

48 CAREY STREET

Interior Space Dividers
Holborn, London, United Kingdom

M22-83

Located on 48 Carey Street in Holborn, London, this new residential development selected Banker Wire's M22-83 mesh to outfit custom-made chandeliers in the ground-floor lobby, room dividers in the library, and ventilation unit screens throughout the complex. Specified in a luxurious bronze, the double-woven mesh is created with a pair of nested helical, crimped woven wires to achieve its wavy, round shape. The softer lines of this mesh was the perfect choice for delicate decorative features as well as for architectural elements that served to provide just enough privacy, or to elegantly conceal unseemly technical units.
