

CEDAR GROVE PARKING GARAGE

Interior Railing
Egan, Minnesota USA

M44-2

SJD-3

The Cedar Grove Parking Garage, located in Egan, MN, is a two-level parking structure designed to accommodate the parking needs of the nearby Paragon Outlet Center and other developments. The architect of the Parking garage was RSP Architects.

Banker Wire's M44-2 is utilized as the railing infill panels on the interior stairs of the parking garage. SJD-3 is utilized as the architectural grates that cover the lower level parking garage openings. Banker Wire also provided the raw sticks of U-edge to Standard Iron for fabrication.
