

# CHRIS PALMER CUT-FOLD MESH CHAIR

Custom Furniture  
Bloomfield Hills, Michigan USA

## SZ-4

Chris Palmer created the Cut-Fold Mesh Chair out of SZ-4 stainless steel wire mesh while studying at the Cranbrook Academy of Art. Starting with one flat piece of mesh, Chris was able to form the chair by cutting, notching, bending and sculpting this creation into form. All edges including the stress relief are upholstered in black felt.

The SZ-4 is woven with a combination of crushed wire and round wire providing an interesting reflective characteristic.
