

UW MILWAUKEE, SOREF LEARNING COMMONS

University Signage
Milwaukee, Wisconsin USA

S-13

The dense and heavy S-13 flat wire weave accents the signs throughout the university commons. The mesh helps add a consistency of design throughout this large gathering space.

Architectural woven wire mesh is often a noticeable material when viewed upon due to the way the surrounding light is received and displayed to the viewer. A sense of "Brand" can be made from this architectural characteristic.
