

MILWAUKEE ELECTRIC TOOL CORPORATION

Interior Railing, Signage, Enclosures
Brookfield, Wisconsin, USA

L-64

Milwaukee Electric Tool Corporation has expanded its Brookfield campus with the addition of a new 200,000-square-foot office space. The new facility was designed with plenty of open-air creative and cross-functional meeting areas as well as a wide variety of office spaces. Banker Wire's L-64 woven wire mesh pattern was used to create railing infills throughout the space, providing adequate strength, durability and visual appeal. The large square weave and plain steel alloy beautifully juxtaposes against the natural surfaces and materials in the open-office environment.
