

# STAINLESS WIRE MESH LOUNGE CHAIR

Custom Furniture  
Bloomfield Hills, Michigan USA

## M12Z-16

Chris Palmer of the Cranbrook Academy of Art set out to design a contemporary piece of furniture using Banker Wire woven wire mesh. The architectural woven wire pattern M12Z-16 provides flex in one direction and rigidity in another direction. The wire mesh panel is arranged on the dark walnut frame in a way that absorbs the human body in a very comfortable and custom way.
